Overview

Junior Achievement programs offer a multidisciplinary approach – connecting information across social studies disciplines such as economics, geography, history, government, and civics while incorporating mathematical concepts and reasoning and language arts skills.

In this document, Junior Achievement programs are correlated to the Arkansas Social Studies Curriculum Framework for grades K-12 as well as the Common Core State Standards in English/ Language Arts (ELA) and mathematics.

This list is not meant to be exhaustive or intended to suggest that a JA program will completely address any given standard, but is designed to show how it can enhance or complement efforts to do so. The flexibility of the programs and supplementary materials allow specific content or skills to be addressed in depth by the teacher and/or business volunteer as needed.

JA Elementary School Programs

JA Ourselves[®] uses storybook characters in read-aloud and hands-on activities to introduce the role people play in an economy. Through engaging, volunteer-led activities, young students learn about individual choices, money, the importance of saving and giving, and the value of work.

JA Our Families[®] introduces students to the intersection of entrepreneurship and first-grade social studies learning objectives, including how family members' jobs and businesses contribute to the well-being of the family.

JA Our Community[®] uses posters and games to offer practical information about businesses and the many jobs those businesses offer in a community. Students explore production methods through a simulation game, and they learn about taxes, decision making, and how money flows in an economy.

JA Our City[®] introduces students to the intersection of financial literacy and third-grade social studies learning objectives, including the characteristics of cities and how people and businesses in cities manage their money.

JA Our Region[®] introduces students to entrepreneurship and how entrepreneurs use resources to produce goods and services in a community. Students solve problems by weighing risks and rewards.

JA Our Nation[®] provides practical information about the need for employees who can meet the demands of the 21st century job market, particularly high-growth, high-demand jobs. By program's end, students will understand the skills, especially in science, technology, engineering, and math that will make their futures brighter.

JA More than Money[®] teaches students about earning, spending, sharing, and saving money, and businesses they can start or jobs they can perform to earn money.
